Skills

- JavaScript | TypeScript
- Backend | Frontend | Full-Stack | Game Development | DevOps
- NodeJs | Bun | Hono | Express | MongoDB | React | NextJS | Tailwind | Phaser | Spark AR | Docker | Kubernetes

Experience

SDE-2 (Full Stack)　　　　　　　[Pazo](#)　　　*Bangalore*　**12/2022 - Current**

- Built and enhanced features for Pazo's product, including optimizing large-scale Excel sheet generation for faster processing.
- Designed and implemented scalable APIs to improve workflow and user experiences.
- Took initiative to architect and build a state manager tailored for React applications.
- Won the company's internal AI Hackathon by developing a chatbot to deliver real-time analytical insights, enhancing data accessibility for decision-makers.

Full-Stack Developer　　　　[4Lunches Creative Tech](#)　　*Bangalore*　**01/2021 - 12/2022**

- Led the development of multiple end-to-end experiences for clients such as **BigBazaar, Aditya Birla** and **V-mart** , attracting over **2+ Lakh** users on average by leveraging technologies such as **Node Js, Express, MongoDb** and **Phaser**.
- Built APIs to capture user generated data including signups and journey milestones, and integrated systems for unique coupon generation and distribution via sms or email providers.
- Created graphical dashboards making it easier for teams to analyze campaign performance.
- Built tools like Multi Atlas generator, 2d collision system to streamline game development.

Game Developer | Freelance　　　[Prize&Fun SAS](#)　　　　*France*

- Developed Web Games for Chiro App using **Phaser**.

Projects

- **CivicFix - Whatsapp Bot:** Developed as a part of Meta LLaMA AI Hackathon (Runner-up, November 2024).
  -Created a Whatsapp bot which helps in reporting civic issues like road damage, garbage disposal or electricity outage.
  -Issues can be reported via text, images, or audio inputs. Supports multiple languages.
- **Whatsapp Bot Builder (Work in progress):** Developing a tool to help users create custom WhatsApp bot flows.
  -Current progress includes basic features like flow creation, saving, and deployment, with working functionality.
  -Impact: Aims to simplify WhatsApp bot creation for non-technical users by providing an intuitive visual interface.
- **Aditya Birla:** Built a gamified responsive interface to recommend health insurance products based on user preferences and inputs.
- **Big Bazaar & V-Mart:** Responsible for interacting with the client and to chart out the development journey.
  -Built interactive 2d games for campaigns where users earned coupons upon reaching specific scores.
  -Integrated backend systems for tracking scores and distributing over 150,000 coupons through SMS.
  -Developed dashboards for real-time analysis of campaign performance.
- **Sandisk:** Responsible for research and development of backend which takes images and videos via an API endpoint and generates a timeline video for sandisk employees..
- **Royal Enfield:** Contributed in creating a fully responsive website for the newly launched Meteor 350 bike.

Others

- **Runner up - Meta LLama AI Hackathon**: Recognized for *CivicFix*, a AI powered WhatsApp bot for reporting civic issues and issue Management. **Reference: [Meta Llama AI Hackathon Blog](#)**　**(10/2024)**
- **Won - Pazo AI Hackathon**: Developed a chatbot that provided real-time analytical insights from system data, improving accessibility and decision-making.　**(12/2023)**
- **Bet 2 Code**: Won 5th prize at an onsite coding competition held by **Indian Institute of Science Bangalore.**　**(02/2020)**
